

Jorge

Information Technology Student & Aspiring Software Developer

jorge@example.com • [City, Country] • github.com/jorge • linkedin.com/in/jorge

SUMMARY

IT student focused on software development, applied AI, and interactive systems. Builds real, working software end to end — most recently Anatomia 3D, an educational Unity application combining interactive 3D models, gamified quizzes, and a Firebase-backed classroom system. Comfortable across the stack: gameplay/UI logic, cloud data, and backend integration.

TECHNICAL SKILLS

Programming	C#, C++, Java, Python, JavaScript
Web Development	HTML, CSS, JavaScript, React, Node.js
Database	Firebase (Auth, Firestore), MySQL, SQLite
Tools	Unity, Git, GitHub, Visual Studio, VS Code, Blender
Other	UI/UX Design, Database Management, Troubleshooting, Cybersecurity Fundamentals, System Analysis

PROJECTS

Anatomia 3D — Lead Developer

Academic Capstone Project · Unity, C#, Firebase, Blender

Designed and built an educational Unity application for Radiologic Technology students. Features interactive 3D anatomy models with touch-based bone tap detection, True/False and multiple-choice quizzes, progress tracking, achievements, and a full admin dashboard with classroom and analytics tools. Backend built on Firebase Authentication, Firestore, and the Firebase AI Logic (Vertex AI) SDK, with role-separated student and admin experiences.

[Project Name]

[Category] · [Tech Stack]

Short description of the project, the problem it solves, and your role in building it.

EXPERIENCE

Lead Developer, Capstone Project

2025 — Present

Anatomia 3D — Academic Project

Designing and building an educational Unity application end to end: 3D model interaction, quiz systems, gamification, and a Firebase backend with role-separated student and admin experiences.

Member, IT Student Organization

2024 — Present

[Organization Name]

Participated in workshops, seminars, and peer coding sessions focused on software development and emerging technology.

Freelance / Personal Projects

2023 — Present

Independent

Built small applications and tools outside of coursework to practice new languages, frameworks, and system design patterns.

EDUCATION

Bachelor of Science in Information Technology

[Year] — Present

[School Name]

Relevant coursework: Data Structures & Algorithms, Database Management Systems, Networking, Systems Analysis & Design, Human-Computer Interaction, Information Assurance & Security. Capstone: Anatomia 3D.
